Subject: RE: Questions Regarding Spike and Oak Wilt

When you get a chance, can you send me the names of any other applicators you know that can do dry herbicide application by helicopter? M & D cannot get to it until April and I'd rather not get into the spring rainy season.

Thank you!

Deanna

Subject: RE: Questions Regarding Spike and Oak Wilt

I would go with M & D if they are willing to do the job. They were one of the applicators I had in mind.

Dr. Lyons-

I've talked to one applicator, M & D Aerial (David George), have you heard of them? And you mentioned knowing a few others perhaps that you could send me? This guy is certified by Dow for Spike applications and seemed to know what he was talking about.

Thanks for your help!

Subject: Questions Regarding Spike and Oak Wilt

Dr. Lyons-

We are looking for some information and insight into using Spike in an area around a confirmed oak wilt outbreak as a possible alternate to trenching. We have already spoken to Dr. Appel and he is coming out to do a site visit but I would like to get your opinion as well on the chemical application. When you get a chance, please give me a call [REDACTED] as I've got some specific questions and can explain a little more about the project. Dr. Appel is coming on Dec 17th and you are welcome to come out as well if this might be of interest to you.

Thank you for your time!
